Q1. Overall performance

Context

During the first half of 2026, Bangladesh continued to face multiple humanitarian challenges, including climate-related hazards such as heavy rainfall in June, public health emergencies like measles outbreak in March, governance transitions in February, severe disruption of fuel supply chain in March and the protracted Population Movement Operation (PMO) in Cox's Bazar. These challenges have been mitigated through developing Business Continuity Plan (BCP) and timely response utilizing contingency stockpiles, limiting field movement and coordinating with government and other key stakeholders. Pre-monsoon flash floods, prolonged heatwaves, and continued preparedness for the cyclone season reinforced the need to strengthen anticipatory action, early warning systems, and disaster preparedness.

The nationwide Measles outbreak in March onward prompted a government-led Measles-Rubella vaccination campaign. As of late June 2026, a cumulative total of 109,000 suspected measles cases, including 11,327 laboratory-confirmed cases, have been reported to the DGHS Health Emergency Operations Centre (HEOC) and Control Room, with 626 suspected deaths and 93 laboratory-confirmed deaths. To contain the outbreak Bangladesh Red Crescent Society (BDRCS) contributed to the government-led response through volunteer mobilization, community engagement, and health system support. Preparations also advanced for the Gavi-supported preventive Oral Cholera Vaccination (POCV) campaign through coordinated planning with the Ministry of Health and humanitarian partners.

Following the appointment of a new Chairman and interim Managing Board in June 2026, BDRCS accelerated key institutional reforms, including governance re-establishment, revision of the BDRCS Ordinance, development of the new Strategic Plan of BDRCS (2027 onwards), Comprehensive National Society Development (NSD) Plan, and Planning Monitoring Evaluation and Reporting (PMER) Framework. At the same time, humanitarian diplomacy and coordination with government, Movement partners, UN agencies, and donors were strengthened, particularly in support of climate action, anticipatory action, migration and displacement, and the ongoing PMO response in Cox's Bazar. These developments helped reinforce BDRCS's auxiliary role and institutional capacity while supporting the effective implementation of the Unified Plan.

Overall, despite a dynamic operating environment, BDRCS continued to strengthen its humanitarian response, preparedness, institutional development, and auxiliary role through close collaboration with government authorities, the IFRC Network, and Movement partners.

Key Achievements

- Under the PMO, BDRCS reached approximately **367,756 people (180,200 male; 187,556 female)** in Cox's Bazar through integrated humanitarian assistance across shelter, health, Water Sanitation and Hygiene (WASH), livelihoods, protection, Disaster Risk Management (DRM), and community engagement.
- BDRCS supported the Government-led Measles-Rubella vaccination campaign by mobilizing more than 1,200 Red Crescent Youth volunteers across 66 Units and 497 vaccination centres, contributing to the vaccination of **911,879 children (461,509 boys and 450,370 girls)** and reaching over 2.1 million people through community awareness activities.

- BDRCS continued delivering essential primary healthcare services through its 56 Mother and Child Health (MCH) Centres, recording **62,394 service contacts**, including 6,308 antenatal care visits, 1,730 safe deliveries, 1,824 postnatal care visits, and 8,422 immunization services, improving access to quality maternal and child healthcare nationwide.
- Through the Integrated Flood Resilience Programme (IFRP), Phase 3, BDRCS strengthened community resilience by supporting flood-affected households with shelter, livelihoods, Disaster Risk Reduction (DRR), health, and WASH interventions, while conducting 176 community and school awareness sessions, **1,435 participants (520 male and 915 female)** were reached.

Q2. Changes and amendments

During this reporting period (January – June 2026), no major changes or amendments have been made to the Unified Plan 2026.

Q3. Measuring results of the IFRC Network Action

Ongoing emergency response

Name of Emergency: Population Movement Operation (PMO)

Appeal number	MDRBD018
Duration of Appeal	18 March 2017 to 31 December 2027 (including revised top-up period from Jan 2025 to Dec 2027)
Funding requirements (for 2025-2027)	Total IFRC: CHF 65 million Total Federation-wide: CHF 87 million
Emergency Appeal	https://go-api.ifrc.org/api/DownloadFile/88319/MDRBD018_REA8
Operational Strategy	https://go-api.ifrc.org/api/DownloadFile/88320/MDRBD018_OS2
Last operation update	Appeals IFRC

Summary of the operation

Nearly nine years after the 2017 influx, 1.2 million displaced people continue to live in 33 overcrowded camps in Cox's Bazar and Bhashan Char Island, making it one of the world's largest and most protracted displacement crises. Since 2024, renewed conflict in Myanmar's Rakhine State has led to an estimated 220,000 new arrivals, of whom 153,640 have been biometrically registered, further increasing pressure on already overcrowded camps where people remain heavily dependent on humanitarian assistance due to restrictions on movement, livelihoods and permanent shelter. The revised emergency appeal 2025 – 2027 targeted over 1.1 million people, while cumulatively reached 1.5 million people including 300,000 in host communities, as new arrivals and population growth continued.

The crisis is compounded by recurrent hazards, including cyclones, heavy monsoon rainfall, flash floods, landslides, fires and disease outbreaks, alongside growing security concerns. These hazards frequently damage shelters and community infrastructure, disrupt health, WASH and other essential services, and increase protection risks, particularly for women, children, older persons and persons with disabilities, who comprise the majority of the camp population. The prolonged crisis has also placed significant social, environmental, and economic pressure on the surrounding host communities, particularly in Ukhiya and Teknaf districts.

The humanitarian response continues to face severe funding constraints despite growing needs. The 2026 Joint Response Plan seeks USD 710 million, while the revised IFRC Emergency Appeal for 2025–2027 period requests CHF 87 million but remains around 70% underfunded. Declining resources have already resulted in reduced food assistance and threaten the continuity of essential services, including shelter, health, WASH, protection, education, and disaster preparedness for both displaced and the affected host communities.

With IFRC Secretariat support for BDRCS, between January and June 2026, approximately 192,677 people, comprising 188,982 people living in camps and 3,695 from host communities, of whom 94,411 are male and 98,266 are female were provided with humanitarian assistance. However, through DRM intervention and its institutional response readiness portfolio, 1.2 million people were directly and indirectly reached both in 33 camps and host communities. 52 per cent of the population covered by the secretariat support as the Federation-wide coverage (including support from all Participating National Societies), between January and June 2026 reached approximately 367,756 people (180,200 males; 187,556 females).

Sectors of intervention

Shelter, Housing and Settlements

Objective:

Strengthen the safety and well-being of the camps and host communities through shelter and settlement solutions.

Between January and June 2026, BDRCS with support from IFRC continued implementing integrated shelter interventions in Camps 11 and 12, reaching 2,281 households of 11,405 people (5,588 males; 5,817 females) through emergency shelter assistance and the construction of 197 Temporary Safer Shelters (TSSs) reaching around 1,000 people.

Emergency shelter assistance was provided to 2,084 households benefiting to 11,303 people (5,106 males; 6,197 females) following Rapid Damage Verification (RDV), enabling timely repairs of shelters damaged by heavy rainfall, strong winds, landslides and other weather-related hazards. In parallel, 3,454 household assessments were completed, comprising 852 TSS assessments, 1,850 care and maintenance assessments, and 752 Mid-Term Shelter (MTS) assessments, supporting evidence-based prioritization and future shelter interventions from July onward.

Livelihoods

Objective:

Support camp and host communities in strengthening their livelihoods to promote well-being and resilience

BDRCS, with support from IFRC, implemented livelihood and technical skills development activities across Camps 11, 13, 17, 18 and 19 to strengthen household self-reliance, food security and income-generating opportunities among the FDMN community. A total of 1,580 people including 1264 females successfully completed training in dress production, fishing-net production, chicken rearing, gas-stove repair, non-formal technical skills and homestead vegetable gardening. Based on an estimated average household size of five, these interventions are expected to benefit approximately 7,900 household members (3,871 males; 4,029 females).

The skills development interventions applied a strong women and youth centred approach, with women primarily participating in dress production, fishing-net making, chicken rearing and vegetable gardening, while youth were engaged in technical trades such as gas stove repair. Participants received practical training and cash incentives in line with BDRCS guidelines, while input materials, production inputs or toolboxes were provided to support the immediate use of acquired knowledge and skills in generating realistic income within the camp.

Health & Care

(Mental Health and psychosocial support / Community Health / Medical Services)

Objective:

Improve access to quality health services for the displaced and host community population to have safe, dignified, and healthy living

During this period, the BDRCS, with support from IFRC, continued providing integrated health services through one Field Hospital, three Health Posts, one Mother and Child Health Care Centre (MCHC), and Community-Based Health and First Aid (CBHFA) interventions. These ongoing healthcare services reached 78,497 people (27,038 males; 51,459 females) in camps and host communities.

From the health facilities, 60,129 patients (18,038 males; 42,091 females) including 104 persons with disabilities (PwDs), out of which 42,539 patients from camps and 17,590 from host community members, received clinical healthcare services through 84,148 consultations. In complementing the clinical services, Community Health interventions generated 206,850 cumulative service contacts, reaching 18,368 people (9,000 males; 9,368 females) out of the catchment population of 43,402 people across eight camps (camps 2E, 6, 8E, 12, 13, 14, 19 and 20 Ext) through household visits, health education, referrals, disease surveillance, psychosocial support, and emergency preparedness activities. The health sector also played a leading role in

the Measles outbreak response since April 2026 through clinical case management, vaccination support, community mobilization, and infection prevention and control measures.

Water, Sanitation and Hygiene

Objective:

Communities experience reduced risk of waterborne and water-related diseases, and as such, enjoy improved wellbeing

BDRCS, with joint support from IFRC and Swedish Red Cross (SweRC) under shared leadership approach, through its WASH program across camps 11, 12, 13, 18, and 19, provided lifesaving water supply, sanitation, and hygiene services to 69,847 people (34,408 males; 35,439 females). The WASH interventions predominantly included regular operations and maintenance, carried out to maintain uninterrupted safe drinking water supply through 15 water supply networks, hand tube wells, two faecal sludge Management (FSM) plants, 15 solid waste management (SWM) plants. In addition, camp cleaning campaigns, repairing latrines and bathing cubicles, hygiene promotion, and distribution of hygiene kits to the displaced people in the target camps. Community volunteers from the displaced populations, involved in this work, were deployed on a cash-for-work basis.

Protection, Gender and Inclusion

Objective:

Empower vulnerable and marginalized individuals and groups in camps and host communities

The Protection Gender and Inclusion (PGI) interventions continue to include, among others, protection awareness, support for the inclusion of PWDs and other extremely vulnerable individuals, protection case reporting, referral and follow-up, and technical support for PGI mainstreaming across population movement operations, mainly in camps 13 and 19. A total of 30,669 people (10,735 males; 19,934 females), including 1,027 persons with disability (PWDs), were reached with various protection prevention and responses, including protection awareness, life skills sessions on embroidery, making fishing nets, arts and crafts, floor mats, provision of protection items (dignity kits) and referral to case management actors.

Community Engagement and Accountability

Objective:

Targeted communities are consulted and are able to share their views about assistance received or planned, and programmes and operations are planned and adapted accordingly

Community engagement remained central to the planning and delivery of sector programmes, ensuring that feedback was systematically captured and key information was shared with displaced people and affected host communities. A total of 42,004 people (male: 20,581 and female: 21,423) from camps 11, 12, 13, 14, 15, 18, and 19, were engaged through targeted community consultations, household visits, campaigns, and other feedback mechanisms such as feedback box, desk, radio listening programme. Once feedback or complaints are collected, then these are segregated into sensitive and non-sensitive categories. Sensitive feedbacks are addressed through regular frequently ask questions and answers or specific sector response, while sensitive feedback are responded through a committee led by BDRCS/IFRC CEA team lead. This engagement upheld Community Engagement and Accountability (CEA) principles and standards across all interventions, including participatory processes for defining selection criteria, identifying recipients, determining assistance modalities and quantities, and planning WASH, shelter, cash, and hygiene support. Meaningful involvement of affected communities contributed to improved transparency, acceptance, and overall quality of programme implementation. The need for trade and materials was identified through community consultation, a transparent community engagement process led livelihood programme useful for the participants, as over 80 per cent participants found utilizing the skills and given materials after the training given.

Risk Reduction, Climate Adaptation and Recovery

Objective:

To strengthen the disaster readiness and resilience of communities

Between January and June 2026, Disaster Risk Management (DRM) interventions of BDRCS reached 62,029 affected people (45,706 males; 16,323 females) across all 33 camps in Cox's Bazar. Cumulatively, 210,997 people were reached, including those provided with DRM targeted support in Cox's Bazar host communities.

Key activities focused on strengthening local preparedness through Cyclone Preparedness Program (CPP) led training for camp volunteers on search and rescue, first aid, and multi-hazard response, alongside mass awareness campaigns, drills, and cultural events at the block level. These interventions improved community readiness for cyclones, fires, floods, landslides, and lightning, while enhancing the capacity of CPP volunteers and thematic groups. During this period a few fire incidents and event of heavy rainfall with landslides were reported. BDRCS, with support

from IFRC and the American Red Cross (AmRC), closely coordinated the response with International Organization for Migration (IOM), United Nations High Commissioner for Refugees (UNHCR), and Refugee Relief and Repatriation Commissioner (RRRC), contributing to safer, more informed, and better-prepared camp communities.

Strategic Priorities

Climate and environment

Progress by the National Society against objectives

Anticipatory Action Humanitarian Action

- The Anticipatory Action (AA) project strengthened the institutionalization of anticipatory action within government systems through coordination with government agencies, the Anticipatory Action Technical Working Group (AA TWG), the Forecast-based Financing (FbF) Taskforce, and Movement partners, promoting harmonized implementation and preparedness.
- Capacity building initiatives strengthened the knowledge and skills of 76 participants, including 50 BDRCS staff and volunteers (31 male, 19 female) and 26 government officials (21 male, 5 female), on Anticipatory Action and the Heatwave National Early Action Protocol (HW nEAP), enhancing local preparedness and coordinated early action.
- To support the finalization of the HW nEAP, a field testing of selected early actions was conducted in Rajshahi, reaching vulnerable communities through the distribution of shading and cooling items including 300 umbrellas, 3,000 hand fans with heatwave awareness messages, establishment of two cooling stations serving more than 1,500 people per day over four days, provision of safe drinking water, and community awareness campaigns. Beneficiary feedback showed 97 per cent satisfaction with the services provided at cooling stations.
- The project also supported relevant government departments for the testing of sectoral triggers for the agriculture and livestock sectors, provided technical support for the revision of the Heatwave Early Action Protocol, and revised Memoranda of Understanding (MoUs) with the Bangladesh Meteorological Department (BMD) and the Flood Forecasting and Warning Centre (FFWC) to strengthen forecast-based collaboration and early action systems in Bangladesh.

Anticipatory Action (AA) – Cyclone Early Action Protocol (EAP)

- Strengthened preparedness and coordination for forecast-based cyclone response through orientation sessions in Khulna, Bagerhat, Patuakhali, and Barguna districts reaching 100 participants (64 male, 36 female) from the BDRCS local authorities, and community representatives, to strengthen understanding of anticipatory actions and their roles in EAP implementation.

- BDRCS organized orientation sessions for 203 Upazila Disaster Management Committee (UzDMC) members and stakeholders (162 male and 41 female) across four cyclone-prone upazilas in Chattogram, Bhola, and Barisal districts. The sessions focused on the Cyclone EAP, anticipatory action principles, and coordination mechanisms to strengthen local preparedness.
- A three-day First Aid and Anticipatory Action training was conducted in Satkhira for 35 Red Crescent Youth volunteers (23 male, 12 female), enhancing their skills in emergency first aid, anticipatory action, and Cyclone EAP implementation.
- A three-day residential training on AA and Cyclone EAP was conducted in Kuakata, Patuakhali, for 26 RCY volunteers (20 male and 6 female) from 13 coastal districts. The training enhanced knowledge of forecast-based action, early action decision-making, and operational readiness through simulation exercises and practical scenarios.
- A five-day simulation exercise engaged approximately 440 participants from government agencies, the Red Cross Red Crescent Movement, and partner organizations, validating operational readiness, strengthening forecast-based decision-making, and informing further refinement of the Cyclone NEAP.

Anticipatory Action (AA) – Cold Wave Early Action Protocol (EAP)

- The Anticipatory Action (AA) - Cold Wave Early Action Protocol (EAP) strengthened preparedness for forecast-based cold wave response by conducting a pre-crisis selection and validation process to identify target people. Preliminary people list (approximately 15,000) were publicly displayed to promote transparency, accountability, and community feedback, engaging 86 participants (66 male, 20 female) in the process. The selected people will support by multipurpose cash grant.
- To strengthen CEA, Information, Education and Communication (IEC) materials were developed and distributed, equipping volunteers with standardized messages on cold wave preparedness, early actions, and community feedback mechanisms to support effective awareness and engagement activities.

Global Thematic Programmatic Partnership (GTPP) Project

- Under the project, a full-scale cyclone NEAP simulation was conducted in Satkhira in April 2026, engaging 40 BDRCS and CPP volunteers (24 male, 16 female), approximately 300 community members (140 male, 160 female), and over 100 government and humanitarian stakeholders. Additionally, 60 Upazila Disaster Management Committee members received AA and early warning orientation, while 26 volunteers (20 male, 6 female) from 13 cyclone-prone units were trained on AA and Cyclone EAP implementation.
- The project also observed Heat Action Day 2026, engaging 68 BDRCS units through a nationwide online awareness session on indoor heat risks and practical heat protection measures, contributing to increased awareness and preparedness across the Red Cross Red Crescent Movement.
- From 5-9 April 2026, BDRCS conducted its first dedicated Information Management (IM) Training in Gazipur under the GTPP project, enhancing the digital data management and analytical capacities of 24 National Headquarters staff (20 male, 4 female). The training covered Kobo Toolbox, Excel, Power BI, and QGIS, strengthening participants' skills in data

collection, analysis, visualization, and GIS mapping, and contributing to more evidence-based planning, improved operational efficiency, and the ongoing digital transformation of BDRCS.

- Under Cash and Voucher Assistance (CVA), BDRCS completed vulnerability analysis, unit categorization, validation workshops, and finalized the draft Emergency Fund Management SOP. A CVA Level-2 Training (22–25 June 2026) strengthened the technical capacity of 26 BDRCS staff and cash practitioners (24 male, 2 female) for quality CVA programming and emergency cash preparedness.

Integrated Flood Resilience Programme (IFRP): Phase-3

- The IFRP: Phase-3 strengthened flood resilience in Tangail through community awareness, disaster preparedness, WASH, health, livelihoods, and resilient infrastructure. During the reporting period, 170 awareness and school sessions on disaster risk reduction (DRR), climate change, heatwaves, pandemic preparedness, and resilience reached 1,052 participants (316 male, 736 female).

BDRCS volunteer conducting courtyard session on DRR, climate change, etc. in Tangail district (Photo: IFRC)

- A total of 4 small-scale mitigation works (road repairing) were completed against the target of 4. A total of 73 community members were involved in the cash-for-work scheme (49 Male, 24 Female). The work reduced flood-related access disruption in vulnerable wards while providing community members with cash-for-work income opportunities.
- Heat action days were observed at 6 schools with discussion sessions and drawing competitions. A total of 383 people (204 males, 179 females) were reached. These events strengthened school-going children's understanding of heatwave risks and climate adaptation practices, contributing to a more climate-aware younger generation in flood-prone communities.
- National Disaster Preparedness Day was observed with rally and discussion sessions at four communities and reached 194 people (125 males and 69 females). The event raised public awareness of disaster risk reduction and reinforced community-level commitment to preparedness.
- The programme supported resilient income-generating livelihoods schemes and shelter construction by providing livelihood cash grants to 87 beneficiaries (BDT 25,000 to 45,000 each/CHF 167 to 301), housing cash grants (BDT 60,000 each/CHF 402) to 57 vulnerable households, delivering livelihood skills training to 151 participants, and conducting agriculture and livelihood consultation sessions for 382 community members, including 268 males and 114 females.

- **IFRC network joint support**

MACP Responsive Grant Bangladesh Project, supported by American Red Cross (AmRC)

- The MACP Responsive Grant Bangladesh Project strengthened knowledge and preparedness on heat-health and climate resilience through seminars, workshops, research, and youth engagement. Three seminars at the University of Dhaka, BRAC University, and Khulna University engaged 171 students and faculty members (89 male, 82 female), increasing awareness of heat-health risks, climate change, and research opportunities.
- The project strengthened institutional and technical capacity by organizing workshops on heat-resilient infrastructure and Heat Action Plan (HAP) development, engaging 28 urban planners, academics, and city officials, and a Heat Action Plan workshop with 92 government officials and Disaster Management Committee members, supporting the development of urban heat resilience strategies and strengthening multi-stakeholder coordination.
- A First Aid, Heat-Health, and Climate Issues training equipped 25 BDRCS staff, CPP personnel, and Red Crescent Youth volunteers (22 male, three female) with knowledge and practical skills to promote community-level heat preparedness and respond to heat-related emergencies.
- The project promoted youth leadership in climate action by identifying 328 students from six colleges in Khulna and Bagerhat as potential Youth Climate Ambassadors, with 60 students (30 male, 30 female) participating in district-level capacity-building workshops to strengthen climate awareness and peer-led advocacy.

Climate Change Adaptation (CCA) Project, Narayanganj, supported by British Red Cross (BRC)

- The CCA project strengthened community resilience through capacity building, climate awareness, disaster preparedness, and environmental conservation in Narayanganj district. Refresher orientations on CEA, PGI, and Fire Safety were conducted for Community Disaster Management Committee (CDMC) members, women's squad members, teachers, and students. A total of 178 participants (60 male, 118 female) enhanced their knowledge and skills on inclusive community engagement, protection principles, fire prevention, emergency response, and safe evacuation.
- The project observed National Disaster Preparedness Day, World Environment Day, and World Water Day through rallies, awareness sessions, disaster drills, drawing competitions, and tree plantation campaigns, engaging 1,950 participants (1,270 male, 680 female).
- A two-day capacity strengthening training was provided to 29 skilled laborers (25 male, four female), enhancing technical skills in climate-resilient construction, electrical work, painting, and plumbing.
- The project established a 53-member Youth Group at the school in Shumilpara Bihari Colony and conducted an orientation for 80 participants (34 male, 46 female) to strengthen youth engagement in future climate resilience and community initiatives.

Nature Pulse Project, Barguna, supported by BRC

- The Nature Pulse Project strengthened community resilience and locally led disaster preparedness by establishing CDMCs and Women Squads across six communities in Patharghata and Taltali upazilas, promoting community leadership, women's participation, and climate adaptation.
- The project commemorated National Disaster Preparedness Day and World Environment Day 2026 across all six project communities through rallies, discussion meetings, and tree sapling distribution to raise awareness on disaster risk reduction, environmental conservation, and community resilience.
- The project enhanced the capacity of staff, volunteers, and community members through a series of technical trainings, including PMER (15 participants: 8 male, 7 female), Mangrove Restoration using the 10-Step Community Based Ecological Mangrove Restoration (CBEMR) approach (20 participants: 10 male, 10 female), CBHFA (20 participants: 9 male, 11 female), DRR and Capacity Building for CDMCs, and Participatory Hygiene and Sanitation Transformation (PHAST) (25 participants: 12 male, 13 female), strengthening competencies in project management, ecosystem restoration, community health, disaster preparedness, and WASH programming.

Adapting to Climate Change Impacts and Livelihood Support Project, supported by Danish Red Cross (DRC)

- The project strengthened climate resilience and flood preparedness in the haor areas of Itna Upazila, Kishoreganj, through livelihood support, community-based early warning systems, and disaster preparedness initiatives.
- A Post Distribution Monitoring (PDM) assessment confirmed the effective implementation of conditional cash grants of BDT 40,000 (CHF 267) provided to 150 vulnerable households for climate-resilient livelihood activities, with beneficiaries reporting high satisfaction and improved livelihood recovery and resilience.
- The project supported the validation of the Flash Flood National Early Action Protocol (NEAP) through a multi-stakeholder consultation workshop, contributing to the development of nationally coordinated forecast-based early actions for flash flood response.
- To strengthen community-based early warning systems, flood markers and signboards were installed and early warning dissemination equipment was distributed to CDMCs and Community Disaster Response Teams (CDRTs) in Dhara and Thaneswor communities. Orientation sessions further enhanced community capacity to operate the equipment and implement early warning procedures.
- The project concluded with a Lessons Learned Workshop and Sustainability Exit Meeting in May 2026, bringing together government representatives, community members, volunteers, and partners to review project achievements, document lessons learned, and promote the sustainability of climate resilience and disaster preparedness initiatives in the target communities.

Rajshahi Youth and Children in Advancing Climate Adaptation and Anticipatory Action within the Education System (RACE), supported by German Red Cross (GRC)

- The RACE Project was officially launched through an inception workshop attended by 47 stakeholders (37 male, 10 female), including representatives from government departments, BDRCS, GRC, school authorities, and other partner organizations. The workshop introduced the project objectives, implementation approach, and formalized collaboration with 15 participating secondary schools.
- The project strengthened emergency preparedness by conducting RCRC Basic and First Aid Training for 180 students from six secondary schools in Rajshahi. The three-day training enhanced participants' knowledge and practical skills in first aid, emergency response, disaster management, and the Fundamental Principles of the Red Cross and Red Crescent Movement.
- To promote youth-led climate action, the project conducted Y-Adapt training for 56 students from two secondary schools, equipping them with knowledge and practical skills on climate change, local climate risks, and adaptation measures, while strengthening youth leadership and climate resilience in schools and communities.

Climate Resilient Clean Cities (3C), supported by Swiss Red Cross (SRC)

- The project strengthened urban resilience through community awareness, disaster risk reduction, climate adaptation, improved WASH services, sustainable waste management, and climate-resilient livelihoods in Gazipur and Khulna districts. During the reporting period, 772 community awareness sessions reached 8,565 people, promoting healthy behaviours, environmental protection, and climate resilience.
- Institutional and community capacities are strengthened by enhancing the BDRCS urban desk, providing technical training for staff, and reconstructing 34 Disaster Management Committees (DMCs). Ward-level Risk Reduction Action Plans (RRAPs) were updated and implemented, supporting interventions such as drainage improvement, road repair, pond restoration, solar streetlight installation, and water management.
- To improve urban waste management, the project launched household solid waste collection services for 900 households in Gazipur and Khulna, established a Material Recovery Facility (MRF) with a daily processing capacity of 280 kg, and initiated construction of a second 300 kg/day MRF. In addition, eight solid waste management awareness campaigns engaged 457 community members, resulting in the cleaning of 1,448 feet of drainage networks, 24 overhead water tanks, and two ponds, benefiting approximately 3,408 people.
- The project implemented climate adaptation and WASH interventions through bioswale drainage systems, solar streetlights, urban green space development, pond restoration, and sanitation improvements. A 300-foot bioswale-integrated walkway and drainage system successfully reduced local waterlogging, while 200 household handwashing basins and 119 hygienic latrines were installed, benefiting approximately 1,792 people.
- To strengthen climate-resilient livelihoods, the project supported 600 households with homestead gardening inputs and provided skills training to 37 participants, enabling vulnerable households to improve food security and access income-generating opportunities.

Road Safety Project with the support of Global Road Safety Partnership (GRSP), supported by IFRC

- BDRCS organized a press conference on 1 February 2026 to advocate for the enactment of a Comprehensive Road Safety Law (CRSL) in Bangladesh. The event generated significant media coverage through 22 online news portals and television channels, helping to raise public awareness and stimulate policy dialogue on road safety.
- BDRCS provided technical and coordination support to the Ministry of Road Transport and Bridges (MoRTB) and the Bangladesh Road Safety Coalition in organizing a Law Committee Meeting on 24 February 2026. The meeting reviewed the draft Road Safety Law and discussed key provisions to strengthen the legislative framework.
- To enhance youth engagement in road safety advocacy, BDRCS conducted a two-day Youth Leadership and Advocacy Workshop on 13-14 May 2026, bringing together 41 youth leaders and RCY volunteers (male-26 and female-15). The initiative strengthened advocacy skills and supported the formation of a youth coalition to engage policymakers on road safety issues.
- Ahead of Eid-ul-Azha, BDRCS organized and aired a road safety talk show on 22 May 2026 featuring representatives from BDRCS and partner organizations. The programme promoted public awareness of road safety and highlighted the need for stronger government action, including the enactment of Comprehensive Road Safety Law.
- During the Eid-ul-Fitr and Eid-ul-Azha holidays, BDRCS mobilized 233 Red Crescent Youth volunteers (male-200 and female-33) at major transport hubs in Dhaka. Volunteers provided first aid services, disseminated road safety messages, and assisted vulnerable travelers, including children, women, older persons, and persons with disabilities, contributing to safer travel and increased public awareness during peak holiday periods.

Disasters and crises

Progress by the National Society against objectives

Emergency Response to the Kalshi Slum Fire Incident

- Following the Kalshi Slum fire in Dhaka North City Corporation on 25 May 2026, BDRCS conducted a rapid assessment and provided emergency assistance to 200 most vulnerable fire-affected households, comprising 887 people (451 female, 436 male). Households received non-food items (NFIs) assistance from BDRCS's pre-positioned disaster preparedness stock, including tarpaulins, blankets, mosquito nets, hygiene parcels, and water jerry cans.

- In addition to relief assistance, BDRCS provided life-saving emergency services, including the evacuation and rescue of 10 people, first aid support to 30 people (including four women), psychosocial support (PSS) to 15 people, and Restoring Family Links (RFL) services that reunited two separated individuals, contributing to a timely and coordinated humanitarian response.

One of the fire affected people in Kalshi Slum in Dhaka receiving NFIs from BDRCS (Photo: BDRCS)

Cash Readiness Programme

- The Cash Readiness Programme strengthened the BDRCS capacity for CVA through evaluation, assessment, information management, and strategic planning. BDRCS provided technical leadership to the National Cash Working Group (NCWG) in conducting Household Economic Assessments (HEA) and Minimum Expenditure Basket (MEB) analyses across nine districts, contributing to the revision of the recommended Multi-Purpose Cash Grant (MPCG) transfer value for rural areas from BDT 6,000 to BDT 8,000 (CHF 40 to 53).
- At the strategic level, BDRCS enhanced institutional capacity through participation in regional CVA for Health Outcomes and Multipurpose Cash Assistance (MPCA) training and developed the BDRCS CVA Plan of Action (2026–2028) and CVA Strategy (2026–2030) to guide future cash programming.

Korail Fire Response Operation

- Following the Korail fire in Dhaka, BDRCS supported the early recovery of vulnerable fire-affected households through MPCG. During January 2026, 500 households (approximately 2,300 people) received BDT 10,000 (CHF 67) per household through mobile money transfer (MMT), in line with the Bangladesh Cash Working Group Urban Cash Package Guideline and BDRCS CVA Standard Operating Procedures. The cash assistance enabled affected households to meet their priority recovery needs, including temporary shelter repair, food, healthcare, debt repayment, and livelihood restoration, contributing to early recovery and strengthening resilience following the emergency response.

Nor'wester (Kalboishakhi) Response

- During the reporting period, BDRCS responded to Nor'wester (Kalboishakhi) storms affecting Panchagarh, Lalmonirhat, and Mymensingh districts by providing emergency relief assistance from its pre-positioned Disaster Preparedness (DP) stocks. A total of 410 households (approximately 1,900 people) received NFIs assistance, including tarpaulins, shelter toolkits, hygiene parcels, mosquito nets, and buckets, to address immediate shelter and essential household needs. The timely emergency response enabled affected households to restore temporary shelter, improve living conditions, and meet urgent humanitarian needs, demonstrating BDRCS's preparedness and rapid response capacity for localized weather-related emergencies.

Winter Blanket Distribution

- BDRCS supported 12,300 vulnerable households (approximately 56,580 people) through winter blankets distribution across 29 district units. The assistance prioritized elderly people, persons with disabilities, women-headed households, and other vulnerable groups living in cold-prone areas to reduce winter-related risks. The programme was implemented with support from the IFRC, AmRC, BRC, DRC, Qatar Red Crescent Society (QRCS), SweRC, Comic Relief, and BDRCS, ensuring timely humanitarian assistance to vulnerable communities during the peak winter season.

Measles DREF Response Operation

- Under the IFRC-DREF-supported Measles Response Operation, BDRCS provided MPCG of BDT 10,000 (CHF 67) to more than 2,000 vulnerable households across 11 hospitals in Dhaka, Chattogram, Barguna, Barishal, Mymensingh, Rangpur, and Cox's Bazar districts, following the assessment of 2,752 patients and caregivers. The cash assistance enabled families to meet essential treatment-related expenses, including food, transportation, medicines, accommodation, and medical consultations, reducing the economic impact of illness and improving access to healthcare.

IFRC network joint support

Coastal Disaster Risk Reduction and Climate Action Programme (CDRRnCA), supported by AmRC

- The programme strengthened disaster preparedness, climate resilience, health, and community capacity across 25 wards in Zianagar, Morrelganj, and Paikgachha upazilas. During the reporting period, 1,200 courtyard sessions reached 10,296 community members (486 male, 9,810 female), increasing awareness of disaster preparedness, climate change adaptation, health, nutrition, and WASH.
- The programme strengthened the capacity of communities, volunteers, and local institutions through a range of trainings, including First Aid, Y-Adapt, Standing Orders on Disaster (SOD), and facilitator training, reaching 856 participants (394 male, 462 female). In addition, 123 Youth and Women's Climate Forum sessions promoted local leadership and community engagement in climate adaptation.
- To reduce disaster risks, the programme implemented 45 small-scale mitigation schemes, including road improvement, pond re-excavation, Pond Sand Filter (PSF) and culvert rehabilitation, providing cash-for-work opportunities to 883 community members and improving access to schools, health facilities, and cyclone shelters.

- The programme improved access to primary healthcare through 16 health camps, providing medical consultation and medicines to 1,061 people (266 male, 795 female). It also organized a large-scale cyclone awareness drill engaging 1,436 community members, strengthening community preparedness and early warning response.
- Climate awareness was further enhanced through 25 community campaigns using street dramas and pot songs, reaching 10,090 people (4,143 male, 5,947 female), while National Disaster Preparedness Day and World Red Cross and Red Crescent Day celebrations engaged 1,369 participants, promoting disaster risk reduction, humanitarian values, volunteerism, and community resilience.

Strengthening DRM Structures and Capacities of the BDRCS (SDSC) Project, Supported by GRC

- During the reporting period, the SDSC project strengthened institutional disaster risk management capacity through training, advocacy, staff development, and stakeholder engagement. A Standing orders on Disaster (SOD) orientation engaged 40 UDMC members in Hatiya, Noakhali, enhancing understanding of disaster management roles, coordination, and implementation. An advocacy initiative on mandatory First Aid training for workers in high-risk sectors reached 53 participants, promoting improved workplace safety and emergency preparedness.
- The project also organized an induction and refresher orientation for 58 BDRCS staff, strengthening knowledge of organizational policies, disaster management, safeguarding, and operational procedures. In addition, National Disaster Preparedness Day (NDPD) 2026 was observed in Noakhali and Bogura, engaging 330 participants through rallies, discussion sessions, and disaster simulation exercises, further promoting disaster preparedness and coordination among government, volunteers, and community stakeholders.
- The Youth & Volunteers (Y&V) component of the SDSC project strengthened youth capacity and community preparedness through training, awareness, and simulation activities. The Y-Adapt rollout was launched in Noakhali and Rangpur, enhancing the capacity of RCY volunteers to lead youth-driven climate adaptation and disaster risk reduction initiatives.
- Community preparedness was strengthened through DRR and Emergency Preparedness orientations for 66 community members, RCRC induction, First Aid, and leadership training for 37 RCY volunteers, and RCRC induction training for 81 newly recruited volunteers, building a stronger volunteer network. A cyclone preparedness simulation engaged 527 participants, improving practical disaster response capacity, while 250 Youth & Volunteer brochures were distributed to each of BDRCS's 68 units to promote volunteerism, strengthen outreach, and enhance visibility of youth activities nationwide.

Community Informed Green Response (CiGR) in Emergencies Project, supported by Swedish Red Cross (SweRC)

- To promote greener emergency operations, BDRCS procured six water trailers to reduce reliance on single-use plastic bottles during emergency responses and over 130 heavy-duty plastic pallets to improve sustainable warehouse management, reduce material damage, and minimize procurement waste under this project.
- The project also strengthened the evidence base for green humanitarian action through research and community engagement. Four CiGR fellows presented research on BDRCS's operational carbon footprint and identified practical low-carbon response options, while

a community perception study demonstrated strong public support for environmentally friendly relief practices and highlighted the need for improved waste management and institutional coordination to advance Green Response initiatives.

School-Based Disaster Risk Assessment and WASH (DRAW), supported by SweRC

- The project strengthened disaster resilience and WASH in educational institutions in Kurigram district through the establishment of 16 School Brigades, conducted orientation sessions on the Red Cross Red Crescent Movement, and delivered 90 school-based DRR awareness sessions, reaching 2,979 students and teachers, while a teachers' orientation engaged 33 participants to strengthen disaster and hygiene education in schools.
- To improve school safety and hygiene, the project completed four small-scale mitigation works and initiated WASH infrastructure improvements, promoting climate-resilient and environmentally sustainable school facilities.
- The project also observed National Disaster Preparedness Day (NDPD) and World Environment Day, engaging 1,388 participants through rallies, awareness sessions, first-aid demonstrations, discussions, and quizzes to promote disaster preparedness, environmental awareness, and community resilience.

Joint Actions for Mitigating Climate Uncertainties and Natural Adversities (JAMUNA) Project, supported by Swiss Red Cross (SRC)

- The JAMUNA project strengthened community resilience through integrated health, WASH, DRR, climate change adaptation (CCA), livelihoods, and nature-based solutions across vulnerable char communities. The project renovated five community clinics, strengthened 24 Community Groups, conducted 2,602 health and hygiene sessions reaching 45,235 people, provided 4,791 reproductive health consultations, and delivered 1,905 DRR and CCA awareness sessions benefiting 36,207 people.
- The project improved WASH and climate-resilient infrastructure by providing access to handwashing facilities for 40,464 people, delivering 2,025 school hygiene sessions to 20,713 students, constructing 72 tube-well platforms, supporting 536 household latrines benefiting 3,021 people, and raising 31 household plinths to reduce flood risks.
- To strengthen climate-resilient livelihoods, the project supported 494 people through agriculture, livestock, entrepreneurship, and vocational skills development, including 100 women receiving tailoring and paper packaging training, 22 youth completing garment skills training, 118 women receiving goat rearing support, 162 women supported with homestead gardening, and 47 women entrepreneurs receiving start-up grants of BDT 15,000 (CHF 100).
- The project also enhanced community preparedness and environmental sustainability by training 70 Community Resilience Volunteers in First Aid and Training of Trainers (ToT), distributing 4,200 winter blankets, promoting nature-based solutions through 472 households receiving tree plantation support, 132 improved cookstoves, and 10 compost pits, while strengthening early warning systems through the repair of 36 flood pillars and 36 bulletin boards, benefiting approximately 28,224 people.

Health and wellbeing

Progress by the National Society against objectives

During the reporting period, BDRCS continued delivering essential primary healthcare services through its network of 56 MCH Centres, providing comprehensive maternal, newborn, child health, and preventive healthcare services to vulnerable communities across Bangladesh.

- Primary Healthcare Services: Recorded 62,394 service contacts, including 6,308 Antenatal Care (ANC) visits, 1,730 safe deliveries, 1,824 Postnatal Care (PNC) visits, 8,422 Expanded Programme on Immunization (EPI) services, 2,635 pathology tests, 20,580 health education sessions, and 4,262 counselling sessions.
- Outdoor Clinic Services: Provided primary healthcare to 843 patients (605 male, 238 female), including outpatient consultations, emergency care for staff and volunteers, 34 family planning services, 74 blood sugar tests, and immunization services for 120 children, including 79 Measles Rubella (MR) vaccinations during the national campaign.

Measles DREF Response Operation

- BDRCS, with IFRC support, deployed more than 1,200 RCY volunteers across 66 Red Crescent Units and 497 vaccination centres, supporting beneficiary registration, crowd management, community awareness, and house-to-house referrals, contributing to the vaccination of 911,879 children (461,509 boys and 450,370 girls) aged 6–59 months.
- Distributed over 200,000 IEC materials, conducted 1,420 miking sessions through 67 BDRCS units, and carried out 91,543 household visits, indirectly reaching approximately 2.13 million people with measles prevention and vaccination messages.
- Through the Epidemic Control for Volunteers (ECV) initiative, 34 Red Crescent Units conducted 1,017 courtyard awareness sessions, reaching 30,392 (Male: 11,470 and Female: 18,922) people with key messages on measles prevention, routine immunization, hygiene, and infection prevention.
- Supported 13 government health facilities with essential medical equipment and provided infection prevention and control (IPC) materials to seven health facilities, enhancing their capacity to manage measles cases.
- Established 25 child-friendly corners at selected vaccination centres in Dhaka South City Corporation, Dhaka North City Corporation, and Sylhet City Corporation, creating safe and supportive spaces for children and caregivers during vaccination.
- Distributed 3,520 hygiene parcels across 17 hospitals and 57 Maternal and Child Health (MCH) Centres, promoting infection prevention and reducing the burden on measles-affected families.

During a countrywide Measles vaccination campaign; a health worker of BDRCS working on vaccination at one of the vaccination centres in Dhaka. (Photo: BDRCS)

Integrated Flood Resilience Programme (IFRP): Phase-3

- The programme improved community health and nutrition by organizing four mobile health camps, reaching 192 people (male – 58 and female – 134), conducting maternal and child health and nutrition sessions for 118 participants (4 males and 114 females), and providing menstrual hygiene and nutrition cash (BDT 4000 each, CHF 27) support to 135 pregnant women and adolescent girls.
- WASH interventions included the installation of 41 tube wells, support for 77 household improved latrines, establishment of hygiene corners in five schools, distribution of 500 hygiene kits and drawing booklet to students, implementation of 50 PHAST sessions reaching 1,191 participants (male – 236 and female - 955), and observation of World Water Day and National Disaster Preparedness Day, promoting safe water, hygiene, and disaster preparedness across the project communities, reached a total of 344 people including 191 males and 153 females.

Global Thematic Programmatic Partnership (GTPP) Project

- During the reporting period, BDRCS strengthened health emergency preparedness by advancing the harmonization of Community-Based Surveillance (CBS) and ECV. Key achievements included the ongoing development of integrated CBS training materials, near completion of a unified National CBS Protocol, continued upgrades to the CBS application, finalization of the BDRCS Health Strategy, and completion of the Epidemic and Pandemic Preparedness and Response Plan, pending Board approval.
- In Health and Information Management, the project continued upgrading the CBS application and dashboard to improve real-time reporting and evidence-based decision-making while initiating procurement of essential software and IT equipment.
- Divisional-level ECV training was conducted for 54 community midwives from 53 MCH centres, strengthening disease surveillance, early detection, reporting, and epidemic response capacities.

Pathways to Healing: A Survivor-Centred Approach to Address Violence and Human Rights Violations in Bangladesh

- Following July 2024 civil unrest, the Pathways to Healing (P2H) project continued providing integrated medical, psychosocial, livelihood and protection support to injured survivors across 16 districts in five divisions. The project assessed and verified 687 targeted people: 675 men and 12 women. Of these, 233 were classified as Category A, meaning critically injured, and 454 as Category B, meaning moderately injured. These classifications were assigned by the Government of Bangladesh based on its assessment of injury severity and were published in the official government gazette.
- Among the 687 people, 416 (60.6 per cent) were identified as having at least one functional difficulty related to seeing, hearing, walking, remembering or concentrating, self-care, or communication, based on the six Washington Group domains used by the project.
- 444 people, 438 male and six female, project participants received a one-time exceptional medical support grant of BDT 11,000 (CHF 72.84/ Euro 68.38) each.
- Holy Family Red Crescent Medical College Hospital (HFRCMCH) provided cashless medical support to 86 people, including 490 consultation and service contacts and seven surgical procedures. This included 490 service contacts comprised of 201 physiotherapy sessions, 79 psychiatric consultations, and 210 orthopedic or other specialist consultations.

- A total of 69 people (45 men and 24 women) completed Mental Health and Psychosocial Support (MHPSS) training or orientation, including 51 psychosocial counsellors and 18 BDRCS staff. The counsellors also received Community Engagement and Accountability (CEA) and Protection Gender and Inclusion (PGI) orientation.
- Nine trade-matching sessions reached 283 people out of which 267 people enrolled in livelihood training, and 32 completed the first two entrepreneurship development training batches.
- 12 BDRCS hotline volunteers received the required orientation on project activities and CEA to strengthen beneficiary feedback management. In addition, 40 health workers (24 female and 16 male) from HFRMCH received PGI orientation to promote respectful, inclusive, dignified, and patient-centered care.
- Photovoice and storytelling activities were initiated, with 31 Red Crescent Youth (RCY) volunteers trained in two batches and deployed to document changes in beneficiaries' lives following project interventions.

IFRC network joint support

Coastal Disaster Risk Reduction and Climate Action Programme (CDRRnCA), supported by AmRC

The program improved access to primary healthcare through 16 health camps in Bagerhat, Khulna & Pirojpur programme areas by providing medical consultation and medicines to 1,061 at-risk community people (266 male, 795 female).

Bangladesh Enhanced Community Resilience Programme, Supported by DRC

- The programme strengthened community health services in Gazipur through non-communicable disease (NCD) prevention, early detection, and primary healthcare. A total of 11,664 people (4,224 male, 7,440 female) received NCD awareness messages, while 1,940 patients (764 male, 1,176 female) received medical consultations through three MCH centres.

- To promote early diagnosis of NCDs, 1,118 people were screened, leading to the identification of 409 new cases, including 235 hypertension, 126 diabetes, and 48 respiratory disease (including asthma) cases, enabling timely referral and treatment.
- As part of the project's sustainability and transition strategy, community exit meetings were conducted across the three MCH centres, engaging 71 Community Management Committee members and local stakeholders to strengthen community ownership and ensure continuity of health services beyond the project period.

Prevention and Management of Diabetes and Other NCDs among Vulnerable Populations, supported by DRC

- During the reporting period, the project strengthened prevention, early detection, and management of NCDs across six MCH centres in Habiganj and Netrokona. A total of 2,963 patients received medical consultations, including 1,322 NCD patients, while 84 complicated cases (63 in Netrokona and 21 in Habiganj) were referred for advanced care. Medicines and screening equipment were supplied to all six MCH centres to support NCD treatment adherence and regular screening.
- Community-based prevention and early detection were strengthened through routine household visits reaching 22,134 people, screening of 8,579 symptomatic individuals for NCDs with referral to health facilities, and 17 courtyard awareness sessions reaching 285 participants. In addition, 18 community support groups involving 251 members (71 male, 180 female) remained active, promoting peer support, follow-up, and continuity of care for people living with NCDs.

Improving Early Detection and Response for Communicable Diseases through a Community-Based Surveillance System, supported by SRC

- During the reporting period, the CBS project strengthened early detection and response to communicable diseases across four unions in Rajshahi, covering a surveillance population of 55,141 people in 14,830 households. A network of 72 trained community volunteers conducted regular surveillance for priority diseases, including dengue, influenza-like illness, acute watery diarrhea, acute jaundice syndrome, and unusual health events, ensuring timely reporting and verification of health alerts.
- To promote community awareness, volunteers conducted courtyard sessions reaching 2,815 people (546 male, 2,269 female) and school awareness sessions reaching 748 students (352 male, 396 female). The project also supported community-wide megaphone campaigns and local government measles vaccination efforts, strengthening community awareness, disease prevention, and outbreak preparedness.

The Stockpile Project–Medical Supply Support, Supported by IFRC

As part of strengthening preparedness and response to COVID-19 and other Emerging Infectious Diseases (EIDs), BDRCS, with the support of IFRC has implemented the Stockpile Project. Under this project, BDRCS, in collaboration with IFRC, has procured and handed over to DGHS the following medical consumables and equipment:

- 35,000 bottles of Cholera Saline were delivered to Khulna, Barishal and Chattogram divisional offices.
- 50 pcs of Apheresis kits delivered in BDRCS Dhaka blood bank.
- 28,750 pcs of Dengue NS1 testing kit handed over to Disease control department of DGHS.

Additionally, At the beginning of March 2026, Bangladesh received a total of 255,132 Cholera RDT kits. With the support of “Stockpile” project funded by ASEF and Government of Japan, by the end of March, these were distributed to more than 500 health facilities, including Upazila Health Complexes, medical college hospitals, and district hospital.

Country Support Platform (CSP) supported by IFRC:

- DGHS, together with key partners, aligned on the priority target areas and implementation timeline for the preventive oral cholera vaccine (pOCV) campaign after reviewing the latest epidemiological data. Based on this agreement, the revised vaccination target areas were finalized, and the pOCV campaign proposal was completed and submitted to Gavi for support. At the same time, discussions continued to develop the overall campaign roadmap, including the sequencing of activities and alignment with national cholera control priorities.
- With technical support from IFRC, the Disease Control Unit of the DGHS led the development of the national Standard Operating Procedure (SoP) for the use of cholera Rapid Diagnostic Tests (RDTs). The SoP was developed in consultation with key technical partners, including IEDCR, icddr,b, and WHO, to provide standardized guidance on cholera RDT testing, reporting, and surveillance across all levels of the health system. This collaborative effort strengthens Bangladesh's cholera surveillance system by promoting early detection, timely reporting through District Health Information Software, version 2 (DHIS2), and a coordinated public health response in line with the National Cholera Control Plan.
- Based on the national cholera testing guideline, three orientation sessions on the use of cholera RDT kits and DHIS2 reporting were conducted in collaboration with the DGHS, reaching more than 500 government health officials across the country. The orientations strengthened the capacity of clinicians, medical officers, resident physicians, senior staff nurses, laboratory technologists, and health inspectors on standardized cholera diagnosis, reporting, and surveillance. These capacity-building efforts support the implementation of Bangladesh's National Cholera Control Plan (NCCP) by improving the quality of case detection, data reporting, and timely public health response.

Gavi Alliance, supported by IFRC:

- During the reporting period, IFRC continued to support the DGHS-led planning and preparedness for the Gavi-supported pOCV campaign through active participation in the Technical Working Group (TWG), contributing to campaign planning, operational guidelines, PMER, CEA, budget reviews, and coordination. Priority implementation areas will cover 5.18 million people in five districts including Dhaka, Kishoreganj, Narayanganj, Munshiganj and Brahmanbaria, with icddr,b leading the urban component and Diseases Control (DC)-DGHS leading the rural component.
- Progress was made in finalizing the campaign's microplanning, operational guidelines, partner agreements, logistics, supervision, monitoring framework, and community engagement strategy. IFRC also secured BDRCS approval to establish cooperation agreements with DGHS and icddr,b, enabling future implementation and fund transfers.
- A CEA Specialist was recruited to strengthen campaign readiness and coordination. As implementation had not yet commenced by the end of the reporting period, expenditures remained limited to project management and technical support, with the vaccination campaign tentatively scheduled for August–October 2026, pending final approval of operational plans and agreements.

Migration and displacement

Progress by the National Society against objectives

- During the reporting period, BDRCS strengthened its migration and displacement programming through field assessments, institutional capacity development, and coordination with Movement and external partners. Key initiatives included a stocktaking operation in Cox's Bazar FDMN camps, a Migration and Displacement Capability Self-Assessment Workshop, and coordination on the India–Bangladesh border movement to enhance preparedness and response planning.
- BDRCS contributed to national, regional, and global migration policy processes by providing inputs to the International Migration Review Forum (IMRF) 2026, reviewing key Movement strategies and guidelines, engaging with the Displacement Management Cluster, and collaborating with the Asia Pacific Migration Network (APMN) to strengthen knowledge sharing and regional coordination on migration issues.

Values, power and inclusion

Progress by the National Society against objectives

- During the reporting period, the BDRCS CEA mechanism strengthened accountability and community engagement through its hotline and feedback system, receiving 1,285 (Male- 954, Female- 266 and 65 did not interested to disclose their identity) feedback calls, including 54 complaints and 1,231 are general feedback, those are primarily related to the Korail Fire Response, Anticipatory Action, and Measles Response Operation, enabling timely response and improved communication with communities.
- BDRCS strengthened institutional CEA capacity by conducting CEA training for 25 Red Crescent Youth (RCY) volunteers in the Chattogram Hill Tracts, orientation sessions for 39 Unit Executive Committee members in Rangamati and Khagrachari, and a CEA Mainstreaming Committee orientation for 19 NHQ technical committee members, promoting people-centred, transparent, and accountable humanitarian programming across the organization.
- Under the IFRC-DREF Measles Response Operation, the CEA team deployed RCY volunteers to support rumour tracking across project districts. Approximately 85 rumours were identified, verified, and documented through coordination with BDRCS units and social media monitoring, providing timely evidence to strengthen risk communication and address misinformation related to measles vaccination.
- To strengthen accountability mechanisms, four feedback and complaint boxes were installed at BDRCS National Headquarters, establishing a structured and confidential system for collecting and responding to feedback from staff, volunteers, and visitors, and supporting continuous service improvement.
- BDRCS observed International Women's Day 2026 at the National Headquarters, bringing together 200 participants (140 male and 60 female). The event promoted awareness of gender equality, women's empowerment, and the importance of creating an inclusive organizational culture that values diversity and equal participation.
- Organized a PGI Training of Trainers (ToT) Refresher for 25 national PGI pool members (14 male, 11 female) and delivered Basic PGI Training for 30 teachers in Kurigram to strengthen PGI mainstreaming in programmes and communities.

- Conducted training on performance evaluation, Annual Confidential Report (ACR) writing, PSEA, child protection, and gender & diversity policy for 29 Directors and Deputy Directors (24 male, 5 female), followed by a PSEA and safeguarding orientation for 14 female staff to strengthen organizational safeguarding and accountability.
- Integrated PGI into operational programmes through three online orientations under the Measles Response, reaching approximately 150 participants, alongside PGI sessions during safer access training (30 participants) and MHPSS training (30 participants) in Gazipur.
- Conducted a sanitary pad vending machine user assessment with 20 female participants and provided MHM orientation for 15 female support staff, generating recommendations to improve menstrual hygiene services and workplace inclusion.
- Conducted an online PGI Knowledge Assessment with approximately 120 BDRCS staff and volunteers to identify capacity gaps and inform future PGI strengthening initiatives.

Enabling functions

Strategic and operational coordination

External Coordination

Under the global Early Warning for All (EW4ALL) initiative, BDRCS, IFRC have been coordinating with Ministry of Disaster Management and Relief (MoDMR), Bangladesh government in ensuring access to timely, reliable early warning information. The National Road map for EW4All is formally endorsed by the Inter-Ministerial Committee during May 2026 and available on the MoDMR website.

IFRC also coordinated with all local and global pillar leads for exchanging early warning and AA related information. IFRC hosted one interpillar coordination meetings at IFRC during the reporting periods.

During the reporting period, IFRC and BDRCS participated number of coordination meetings organized by the United Nation Resident Coordinator (UNRC), Inter Cluster Coordination Group (ICCG), Food Security Cluster, the National Cash Working Group, Displacement Management Cluster and the WASH Cluster in Bangladesh. They contributed to strategic planning and coordination efforts in these respective sectors.

IFRC has been continuing external coordination with the office of the RRRC, key humanitarian partners including International Organization for Migration (IOM), United Nations High Commissioner for Refugees (UNHCR), and their site management partners in order to better facilitate ongoing collaboration in the field of Emergency Preparedness and Response (EPR) in Cox's Bazar camp settlement.

In June, a Strategic Partnership and Resource Mobilization mission strengthened collaboration among BDRCS, IFRC, and PNSs while expanding engagement with key donors and development partners. The mission reinforced the Ways of Working (WoW) agenda, identified funding opportunities in health, DRM, climate resilience, and Cox's Bazar, and enhanced partnerships with the European Union (EU), Gulf partners, Asian Development Bank (ADB), the World Bank, and

Islamic Development Bank (IsDB). It also emphasized joint fundraising, coordinated donor engagement, alignment of the IFRC Unified Plan with the BDRCS Strategic Plan, and stronger positioning of BDRCS as a trusted auxiliary to government.

BDRCS and IFRC worked closely with MoDMR, Disaster Management and Relief (DDM), CPP, BMD, and Anticipatory Action Technical Working Group (AATWG) partners to strengthen national and sub-national coordination for anticipatory action. The Cyclone NEAP Simulation Exercise served as a key platform to bring together government authorities, local DMCs, community representatives, UN agencies and humanitarian partners to test and strengthen coordination, communication, and decision-making mechanisms for cyclone anticipatory action. The exercise enhanced multi-stakeholder collaboration, validated existing coordination arrangements, and generated lessons to strengthen institutional readiness and integration of anticipatory action within national disaster management systems.

WASH Cluster Coordination

IFRC and BDRCS WASH personnel attended two WASH cluster meetings during the reporting period and informed the cluster members regarding the WASH readiness and preparedness initiatives in terms of the upcoming flood season.

Shelter Cluster Coordination

Nor'wester Response: Between 12–29 March 2026, severe Nor'wester storms affected several districts in Bangladesh, causing widespread damage to housing, crops, and livestock, particularly in the north and southwest. Five fatalities were reported, and transport disruptions occurred, including a temporary suspension of ferry services on the Paturia–Daulatdia route. SKS Foundation supported 300 households with cash grants and 40 households with shelter/houses construction, while BDRCS provided household support items to 350 families.

Cold Wave/Winter Response: During January and early February 2026, mild cold waves affected northern and western Bangladesh. More than 176,000 cases of cold-related illnesses and 72 deaths were reported nationwide. The Government and humanitarian partners distributed over 219,000 blankets and winter packages and allocated more than USD 700,000 to support vulnerable communities, helping reduce the impact of the cold weather.

Shelter Cluster Plan 2026: In 2026, Shelter Cluster Bangladesh is strengthening preparedness, coordination, and response capacity through regular coordination meetings, revision of shelter standards, earthquake preparedness planning, partner mapping, joint assessments, and capacity-building initiatives. These efforts aim to improve coordinated, resilient, and inclusive shelter responses across Bangladesh.

Online Knowledge-Sharing Sessions: By June 2026, Shelter Cluster Bangladesh conducted four online knowledge-sharing sessions on earthquake preparedness, environmental sustainability, environmental screening, and Housing, land and property (HLP) rights. Facilitated by government representatives and technical experts, the sessions engaged 247 participants and contributed to sector-wide capacity strengthening.

Review of Shelter Standards and Guidelines: The Shelter Cluster Technical Working Group developed draft shelter response packages and collected partner feedback. The MoDMR will

review and endorse the final shelter standards and guidelines, with publication expected in August 2026.

Pre-positioned Relief Items: Shelter Cluster Bangladesh compiled information on partners' pre-positioned stocks for 2026. Available supplies, including shelter materials, NFIs, kitchen sets, and cash assistance, are sufficient to support approximately 30,000 families. Key partners include BRAC, BDRCS, Save the Children International (SCI), Community Development Programme (CDP), and Norwegian Refugee Council (NRC).

Shelter Cluster Meetings: The Shelter Cluster held four monthly meetings during the reporting period. Discussions focused on the Korail fire response, winter response activities, partner interventions, the Shelter Cluster Plan 2026, People in Need (PiN) calculation guidelines, and proposed shelter response packages. These meetings supported coordination and partner engagement on key shelter priorities.

National Society development

Progress by the National Society against objectives

Strategic Reflections on NSD Support and Organizational Transformation: An analysis of the 2025 NSD work, the current institutional situation of BDRCS, and anticipated priorities for 2026 and beyond indicates that BDRCS is entering a critical phase requiring comprehensive organizational transformation. This assessment is consistent with findings from the most recent NSD reflection and planning workshop.

The transformation required spans multiple, interlinked dimensions:

- Legal reform (Ordinance, statutes, rules, and procedures)
- Governance reform and credible elections
- Membership and volunteer base reform at branch level
- Human resource systems reform and modernization
- Financial sustainability through diversified income and finance development
- Strengthen auxiliary role positioning and public trust through branding and visibility

Governance Re-establishment

BDRCS continued its governance transition at both National Headquarters and branch levels. On 20 June 2026, a new Chairman was appointed for a three-year term, alongside an ad hoc Managing Board for three months. Throughout the transition, IFRC, together with ICRC and in-country Movement partners, continued advocacy with the Government to support stable leadership and provided technical assistance for branch governance elections. By the end of the reporting period, around 30 of 68 district units had completed elections, laying the foundation for re-establishing the National Managing Board and strengthening organizational governance.

Revision of the BDRCS Law (President Order Number-26)

The revised BDRCS Ordinance was completed and submitted to the Ministry of Health for final approval, and this after 1) receiving the feedback from the Joint Statutory Commission (JSC); 2) after publishing the draft Ordinance on BDRCS website for comments; 3) The Ordinance has been

translated into Bangla through the legal team; 4) It was approved by the BDRCS Management Board.

A high-level advocacy meeting with the Minister of Health, together with the BDRCS Chairman, Vice-Chairman, and Secretary General was held on 8 February 2026 to expedite Cabinet approval; however, the process was delayed due to the national election timeline. Following the appointment of a new Chairman and ad-hoc Managing Board in June 2026, the revised Ordinance is under review and has been identified as a key governance priority for strengthening the legal and institutional framework of BDRCS.

Agreement has been reached with the BDRCS previous Management Board on the Terms of Reference for the BDRCS integrity committee, which will function as an advisory and oversight body to:

- Strengthen integrity, safeguarding, and accountability systems
- Promote survivor-centered and fair complaint handling
- Translate integrity commitments into daily practice
- Reduce organizational, reputational, and fiduciary risk

The Committee will also support the review and development of key integrity policies, including the Whistleblower Policy, in line with national labour law and the IFRC Integrity Framework. In parallel, BDRCS initiated the development of a comprehensive Anti-Sexual Harassment Policy, engaging an external consultant to prepare a draft policy that will strengthen safeguarding, workplace protection, and accountability across the organization.

Way of Working (WoW)

BDRCS and the IFRC Network continued advancing the Way of Working (WoW) agenda through five formal consultations since April 2026, promoting stronger National Society leadership, joint planning, shared accountability, and coordinated implementation. Key achievements included development of the Bangladesh WoW Framework, establishment of a WoW Process Coordinator, creation of a SharePoint knowledge repository, finalization of the Terms of Reference for thematic leadership and coordination, completion of a shared support services mapping exercise, and progress towards harmonized resource mobilization aligned with the forthcoming BDRCS Strategic Plan (2027 onwards). With the appointment of the new Chairman and Management Board in June 2026, implementation is expected to accelerate during the second half of the year.

Movement Cooperation Agreement (MCA)

The MCA has finally agreed and signed by the three components of the movement during this reporting period.

Finance Development

A finance development plan of action has been prepared with support from Norwegian Red Cross. A joint finance development working group has been established with finance experts from IFRC, PNSs and BDRCS finance colleagues. This working group will implement the finance development Plan of Action (PoA).

Youth and Volunteers

- During this period BDRCS established 246 new Red Crescent Youth (RCY) teams across 246 educational institutions, recruiting 12,878 new volunteers (5,905 male, 6,973 female). All volunteers received RCRC induction and Basic First Aid training, strengthening school-based disaster preparedness, health promotion, and community resilience.
- Deployed 233 RCY volunteers during Eid-ul-Fitr and Eid-ul-Azha travel support campaigns at major transport hubs, providing first aid, road safety awareness, and assistance to vulnerable travelers. RCY volunteers also supported first aid services, awareness campaigns, national day observations, and other National Society activities.
- Conducted national consultation meetings in four batches involving approximately 140 volunteers from all 68 BDRCS units to review and strengthen the draft BDRCS volunteer policy, with recommendations focusing on volunteer management, safety, leadership, recognition, digital volunteering, and youth engagement.
- Organized a Youth Skill Development Consultation Workshop with 47 RCY volunteers from 11 Units to identify priority competencies for humanitarian leadership and employability. The recommendations will inform the development of a structured RCY skill empowerment programme covering communication, digital skills, AI, data management, facilitation, reporting, negotiation, and professional development.

IFRC network joint support

Bangladesh Comprehensive National Society Development (NSD) Programme, supported by BRC

During the reporting period, BDRCS advanced its organizational development by initiating the formulation of a new Strategic Plan (2027 and onwards) and strengthening a coordinated One NSD approach. A concept note outlining the roadmap for the new Strategic Plan was developed, consulted with directors, staff, and Movement partners, and refined based on stakeholder feedback.

To enhance coherence and strategic alignment, BDRCS organized an NSD learning, reflection, and planning workshop, bringing together directors, technical departments, and in-country Movement partners. The workshop resulted in the development of a One NSD Plan and Results Framework, providing a unified approach to NSD and supporting coordinated implementation of BDRCS's long-term organizational transformation goals.

Humanitarian diplomacy and communications

Progress by the National Society against objectives

BDRCS, together with other Movement partners, continues to play a pivotal role in humanitarian diplomacy (HD) by influencing decision-making in favour of the most vulnerable, guided by operational evidence and the fundamental principles.

- BDRCS strengthened its humanitarian diplomacy capacity through the finalization and endorsement of the BDRCS Humanitarian Diplomacy Strategy, including a Plan of Action and stakeholder mapping, aligned with IFRC priorities and informed by consultations with Movement partners, government, UN agencies, academia, and humanitarian stakeholders.
- BDRCS facilitated the IFRC Regional Humanitarian Diplomacy and Migration Mission to Bangladesh, supporting high-level engagement with government, UN agencies, donors, and humanitarian partners, including field visits to Cox's Bazar, while also supporting the Election Coordination Cell and participating in humanitarian negotiation and International Humanitarian Law (IHL) initiatives.
- IFRC and BDRCS strengthened humanitarian diplomacy and strategic partnerships through continued engagement with government ministries, donors, UN agencies, embassies, and the Humanitarian Coordination Task Team (HCTT), promoting locally led climate adaptation, disaster risk reduction, anticipatory action, pandemic preparedness, and community-based early warning.
- BDRCS and IFRC provided technical support to the Government in developing key national disaster management frameworks, including the National Early Warning Protocols, National Framework on Anticipatory Action, and revised Community Risk Assessment (CRA) and Urban Risk Assessment (URA) guidelines, contributing to stronger national preparedness and risk-informed decision-making.
- BDRCS and IFRC advanced national and global advocacy through engagement with the Ministry of Environment, Forest and Climate Change (MoEFCC) on Bangladesh's national tree plantation initiative and by supporting DGHS participation in the Global Cholera Research Agenda Workshop in Geneva, strengthening evidence-based planning and international collaboration on cholera prevention and control.

Accountability and agility (cross-cutting)

Progress by the National Society against objectives

Planning Monitoring Evaluation and Reporting (PMER)

The BDRCS PMER Framework was finalized and formally approved in 2026 through a collaborative process involving BDRCS, IFRC, and PNSs. Following its launch, the framework was disseminated to senior management, NHQ departments, PNSs, and IFRC, with rollout initiated to strengthen the integration of standardized PMER approaches across regular programmes and emergency operations. The framework serves as both a policy reference and practical operational guide, providing standardized tools, templates, checklists, and processes to improve planning, monitoring, evaluation, and reporting across the organization.

Information Management (IM)

During the reporting period, BDRCS strengthened its information management capacity through digital transformation initiatives, institutional systems development, and operational technical support. Following are the key achievements:

- Under the IFRC-supported GTPP project, BDRCS conducted its first dedicated Information Management Training, equipping 24 NHQ staff with practical skills in digital data collection, analysis, visualization, and GIS using Kobo Toolbox, Excel, Power BI, and QGIS.
- Initiated the development of a BDRCS Data Protection Strategy, beginning with a consultation of the digitalization sub-working group to identify priorities and inform the drafting process.
- Strengthened the Measles Response Operation by establishing a real-time information management system, including Kobo-based digital data collection, interactive Power BI dashboards, data quality monitoring, and indicator tracking. These enhancements improved operational visibility, accountability, and evidence-based decision-making throughout the response.

Communication

The department provided communications support for key humanitarian initiatives, including promotion of the free medical camp in Cox's Bazar, production of the road safety television talk show on Channel 24, development of IEC materials and audiovisual products for multiple departments, and facilitation of photo voice training for community volunteers under the P2H project, strengthening community storytelling and visibility of humanitarian action.

IFRC network joint support

- IFRC health and PMER team conducted a monitoring visit to Dhaka North City Corporation (DNCC) Hospital to observe the MPCG assessment being conducted for measles-affected families, and to follow up on medical equipment support provided to hospital under the Measles operation.
- Covering the period from December 2023 to March 2026, the evaluation of the ASEF-Stockpile Project was conducted, which primarily engaged IFRC regional and country delegation teams to review programme inception, planning, and implementation processes, identify successes and lessons learned, and provide recommendations for future cycles.
- During this reporting period, IFRC supported the publication of 115 national and international news stories, reaching an estimated audience of more than 3 million. In addition, IFRC produced 47 social media posts and 12 multimedia stories. IFRC also supported and mentored 30+ communications and storytelling volunteers, providing guidance on field content collection and strengthening their capacity for effective humanitarian storytelling. Produced 20+ infographics and visual creative; designed high level reporting documents including [Forced to Move: Displacement to Secondary Cities](#).

Some Key news:

1. [IFRC, BDRCS launch six-month emergency response amid measles surge](#)
2. [Bangladesh, IFRC discuss boosting humanitarian cooperation](#)
3. [IFRC warns harmful information putting lives at risk during crisis](#)
4. [Health minister: Four lakh additional children vaccinated against measles beyond target](#)
5. [Heat Action Day 2026: Hidden danger of indoor heat takes centre stage](#)

Video stories

1. Joining other stakeholders in the nationwide [Measles Response Operation](#) and supporting the Government's efforts, BDRCS, with support from IFRC, contributed to the mass vaccination campaign and community awareness activities to help protect children and prevent further spread of the disease. Across vaccination centres, more than 1,200 Red Crescent Youth (RCY) volunteers supported awareness activities and assisted families. To make the vaccination experience safer and more comforting for children, BDRCS and IFRC also established around 25 child-friendly corners at vaccination centres, providing rest spaces, colorful toys, and a caring environment for children and caregivers.
2. From frontline volunteers to hospital wards, collective humanitarian action is helping protect children from Measles in Bangladesh. During a [visit to Holy Family Red Crescent Medical College and Hospital](#) in Dhaka, Hans Das, Deputy Director-General of EU Civil Protection & Humanitarian Aid, and the EU Ambassador to Bangladesh witnessed how BDRCS, with IFRC-DREF support, is complementing the Government's response to the Measles surge. He shared his thoughts on the successful DREF operation of Measles in Bangladesh leading by IFRC and BDRCS.
3. The visual story is about a [climate displaced community member](#), Farida Begum. She has experienced the impact of river erosion more than once. Along the banks of the Jamuna River, she has lost her home twice and faced repeated displacement, while continuing to care for her family and support her four daughters.

Through the Integrated Flood Resilience Programme (IFRP) Phase III, implemented by the BDRCS with technical support from the IFRC Farida received BDT 60,000 to support the reconstruction of her home. Combining the assistance with her own savings, she was able to build a safer and more dignified shelter, where her family has now been living for nearly a year.

4. A [devastating fire](#) tore through Korail Slum in Dhaka, destroying around 1,850 shanties and leaving thousands of families, including Payel's, without shelter or security. BDRCS, with support from IFRC and partners, mobilized 150 Red Crescent Youth volunteers, deployed ambulances, and distributed emergency relief to affected households. Building on the immediate emergency response, BDRCS subsequently provided household recovery assistance to 1,050 affected families, helping them rebuild their lives with dignity, hope, and resilience.

Q4. Affected persons (people reached)

See cover pages for data on indicators.

Q5. Participation and accountability for affected people – Community Engagement and Accountability

See under Q3 – Values, Power and Inclusion for Community Engagement and Accountability results.

Q6. Risk management

Risk	Likelihood	Impact	Mitigating actions
	Low/medium/high	Low/medium/high	
1. Funding/resources gaps to effectively implement the operation plan & EAs activities.	High	High	- Rolling forecast and quarterly resource review. - Joint resource mobilization with Movement partners.
2. Political instability & civil unrest (esp. around elections)	High	High	- Security monitoring and advisory sharing. - Coordination with Govt./UN/INGOs, relevant law enforcement and other agencies. - Apply IFRC/BDRCS security protocols. - Contingency planning for operations.
3. Limited long-term/development funding	High	Medium	- Donor advocacy for multi-year funding. - Robust approach to non-traditional donors (CSR, climate funds).

			Strengthen evidence-based reporting.
4. Governance changes at the branch level (linked to political transition)	High	Medium	- Engage NHQ staff to support continuity. - Engage with ad-hoc committees as per NS procedure and local administration.
5. Escalation of climate-related disasters (floods, cyclones, heatwaves).	High	High	- Strengthen Early Warning–Early Action systems. - Integrate climate adaptation/resilience into programmes.
6. Supply chain disruptions due to political/economic shifts.	Medium	High	- Regular supplier prequalification and framework agreements. - Buffer stock maintenance and diversified procurement.
7. Geopolitical or regional tensions affecting humanitarian space (e.g., border tensions, Rohingya response)	Medium	Medium	- Maintain neutrality and independence in all operations. - Close coordination with Movement partners & humanitarian diplomacy. - Flexible contingency planning for cross-border humanitarian implications.

Q7. Exit strategy and sustainability

See Q3 – Information on exit strategy is provided under the relevant sections of question 3.

Q8. Lessons learned

Evaluation Title (Tentative title if final title not available)	Location(s) covered by the Evaluation	Strategic Priority / Enabling Function	Organization (National Society/PNS/ IFRC/ Joint)	Completion/intended completion date
Mid-term Evaluation of Cash and Voucher Assistance Preparedness (CVAP)	Dhaka	Disaster and Crisis	BDRCS, funded by BRC	June 2026
Self-assessment of Migration and displacement	Satkhira, Shariatpur, Manikganj, Barguna, Cumilla, Kurigram districts	Migration and Displacement	BDRCS, funded by BRC	April 2026

Community Perception study on Green Response in Emergency Operations	Noakhali, Lakshmipur, Cumilla	Climate and Environment	BDRCS funded by SweRC	March 2026
--	-------------------------------	-------------------------	-----------------------	------------

Success stories

1. In Rajshahi, over 52,000 people were reached through [Community Based Surveillance](#), helping detect risks early and respond fast. More than 2,200 suspected health events were identified and managed. Led by BDRCS, volunteers and health workers are working hand in hand with communities to stop health threats before they spread. This effort is supported by IFRC, the Norwegian Red Cross, and other partners, in close coordination with local health authorities and the IEDCR under the Ministry of Health and Family Welfare (MoHFW), Bangladesh.
2. Across the Asia-Pacific, climate change is no longer a distant threat; it's a daily reality. Every year, millions of people face stronger storms, rising waters, and growing uncertainty. Some are forced to leave their homes. Others are trapped and unable to move without support. The [video](#) showcased how Bangladesh alone, extreme weather has triggered more than 21 million internal displacements between 2008 and 2024. In 2023, with the support of the IFRC, BDRCS reached 3.4 million people through disaster response and early recovery, and 926,000 through long-term programmes. This documentary explores the lives of fishing communities as climate change reshapes their livelihoods and forces of displacement.
3. Meet [Nabirun](#) a woman earning an income through making objects out of bamboo. After facing repeated floods and disasters, she is rebuilding her future with courage, skills, and determination. Today, she not only supports her family but also inspires and trains others in her community. Nabirun is one of hundreds of people that are strengthening their resilience through sustainable livelihoods, community action, and disaster preparedness.

Annex 1. IFRC application of the 8+3 reporting template

The IFRC network structures its result-based management along five Strategic priorities and four Enabling functions, developed based on the IFRC network's [Strategy 2030](#):

IFRC network Strategic Priorities	IFRC network Enabling Functions
SP 1 - Climate and environment	EF 1- Strategic and operational coordination
SP 2 - Disasters and crises	EF 2 - National Society development
SP 3 - Health and wellbeing	EF 3 - Humanitarian diplomacy
SP 4 - Migration and displacement	EF 4 - Accountability and agility
SP 5 - Values, power and inclusion	

The Federation-wide results matrix provides a standard way for the IFRC network to measure its progress towards Strategy 2030 implementation and supports consistent quality of the IFRC network planning, monitoring and reporting. To further advance coherence in monitoring across the IFRC network, a [Federation-wide Indicator Bank](#) has been developed and integrated into the Federation-wide monitoring systems for emergencies and longer-term work, structured along the Federation-wide results matrix as well. Signatory of the Grand Bargain Agreement, the IFRC has committed to its monitoring and reporting standards through integration of the [8+3 reporting template](#) contents into its results-based management approach. The following mapping demonstrate the way in which this report aligns with 8+3 reporting:

8+3 template	IFRC network Annual Report (with variance in structure in red)
Core Questions	
1. Overall Performance	Overall Performance
2. Changes and Amendments	Changes and amendments
3. Measuring Results	Measuring Results
4. Affected Persons	Cover pages with indicators values
5. Participation & AAP	Under Q3 Strategic Priority 5: Values, power and inclusion – Community Engagement and Accountability
6. Risk management	Risk management
7. Exit Strategy and Sustainability	Under Q3 sub-sections by Strategic Priority/Enabling Function where relevant
8. Lessons Learned	Lessons learned
Additional Questions	
1. Value for Money/ Cost Effectiveness	Not included in mid-year reports
2. Visibility	Not included in mid-year reports
3. Coordination	Under Q3 Enabling Function 1: Strategic and operational coordination
4. Implementing Partners	Cross-cutting, with a focus on support to localization through the Q3 Enabling Functions 1 to 4
5. Activities or Steps Towards implementation	Cross-cutting in Q3 Strategic Priorities and Enabling Functions
6. Environment	Under Q3 Strategic Priority 1: Climate and environment
